identification and
assessment

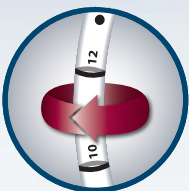

The first Umbilical
Catheter designed with
360° Markings

**Easy
Identification
Hubs**

**Sliding
Clamps**

**360°
Degree
Markings**

Umbilical Catheters

Protection you can count on

Footprint Medical umbilical products offer unique features that allow clinicians more convenience with accuracy in placement, tracking and maintaining the catheter.

Let us show you the Footprint Medical difference... Talk to a representative today!

- Made of soft, biocompatible medical grade silicone or polyurethane
- Latex Free and DEHP Free
- Bold, indelible markings every centimeter allow for accurate placement and assessment
- Radiopaque stripe for confirmation of tip placement by x-ray
- Proximal hubs made of inert Polypropylene for excellent chemical resistance and mechanical stability
- Smooth, rounded tip surface designed to reduce thrombogenicity

Easy Identification Hub

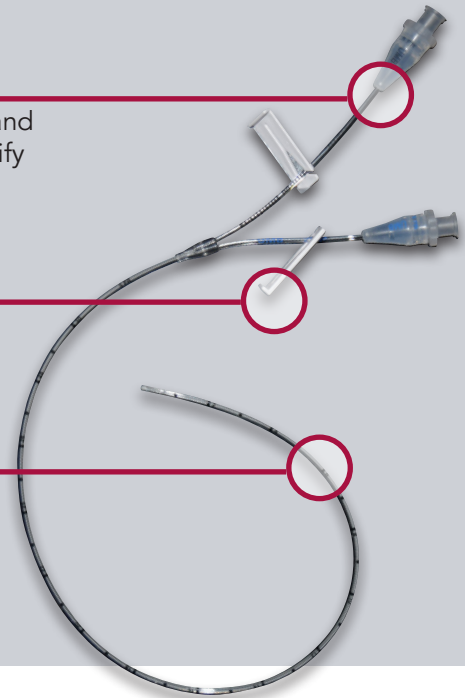

is clearly marked with "UMB" and the French size to readily identify the catheter type and size.

Integral Sliding Clamps

allow the clinician to safely facilitate line changes.

360° Degree Markings

around the catheter body provide easier visualization for accurate placement depth and tracking.
